

Integration CAN-D's Summer School for Early Career Researchers is calling for applications now!

The project Integration CAN-D, funded by the BMBF, is organizing a summer school for early career researchers in the field of research on the integration of refugees Germany and Canada. The summer school will take place from September 9 through September 13, 2019 in Munich at the LMU in Germany.

Integration CAN-D facilitates and coordinates collaborative research efforts on the integration of refugees in Canada and Germany, thereby building and expanding the evidence base for social and political debate. In addition to research networking the project supports knowledge transfer and activation. For further information on Integration CAN-D see:

<http://www.leibniz-bildungspotenziale.de/integration-can-d>

With the summer school, we strive to support the international exchange between early-career researchers and the participating experts in our four research areas:

- Economic, social and political challenges facing refugee children, youth and families
- Language, literacy and learning
- Social integration, human rights, social stigma, culture, and security/violence
- Mental health and well-being

To facilitate the cooperation and the exchange we are planning various formats:

- Leading international researchers will give keynotes in all of our four main areas
- Emerging researchers will have the opportunity to present their own research projects in small working groups, discuss them with fellow participants and receive comments from experts in their field
- specific issues and questions can be addressed in one-to-one consultations
- as a special topic there we will conduct a workshop on strategies of knowledge mobilization in refugee research

The number of participants is limited to 22 emerging researchers from Germany and 4 from Canada in their late doctoral or early post-doc phase. The conference language is English. Participation is free of charge. Participants need to cover their travel costs, accommodation and lunch will be provided.

If you would like to apply for participating at the Summer School, please submit (in English):

- Letter of Motivation: Please specify your research interest and explain why you are interested in participating
- CV
- Abstract of your research project (max. one page)

Please collate the required documents in one single pdf-file and send it to muehlhaeusser@dipf.de. The deadline for submitting applications is on June 16. The applications will be reviewed by a group of international experts from all of the four fields. Applicants will be notified by the beginning of July.

Please don't hesitate to forward the call for applications to early career researchers who might be interested to participate. We are looking forward to your application!

Kind regards,

Nicola Mühlhäußer (project co-ordinator Integration CAN-D)

Karin Zimmer (project lead Integration CAN-D)

Claudia Riehl, Mohcine Ait Ramdan, Andrea Wünsch (LMU Munich)
